Hot Spot Analysis

All 220 EMAN members were mapped and assigned to one of 459, 4.5 acres grid cells. Grid cells were classified by Getis-Ord (GI*) Z score and p-values based on the number of members in each cell.

Statistically significant hot spots and cold spots are cells with high or low Z scores, 3 or -3 respectively that are surrounded by other cells with high or low values.

Hot spot and cold spot cells with 90%, 95% and 99% confidence levels
